ACADEMIC PROJECTS

Dailygram

A news aggregating web application.

I led a team of five on this project for our fourth semester credited evaluation. I along with two other members worked on the frontend with ExpressJS, ReactJS and NextJS. We implemented basic User interface and the custom REST API integration for the flow of the app.

KU-Connect

Time managing utility mobile application.

I worked in a team of three members to build a mobile application with Flutter and custom Javascript REST API in third semester. I mainly worked on the part of API, building endpoints and creating interface for the mobile application to interact with the database (MongoDB).

Opportunity

Simple web browser for Windows 10.

Implemented WebView component of Universal Windows Platform (UWP) with C++ to build a basic web browser for devices running windows 10. This project was a part of credited evaluation for second semester.

EDUCATION

Bachelor of Computer Science

Kathmandu University [2018 - ongoing]
KU Central Campus, Dhulikhel

GCE A-Level

Bridgewater International Academy [2015 - 2017]
Sinamangal, Kathmandu

SKILLS

- Functional & Object-Oriented Programming.
- Basic database modelling and management.
- Basic web development.
- Programming languages: JS/TS, C/C++, Python
